

---

<b>Description:</b>	Aluminum triformate
<b>Aspect:</b>	Thin white powder.
<b>Concentration:</b>	> 84%
<b>pH (sol. 10%):</b>	3,0 – 5,5
<b>Charge:</b>	Cationic.
<b>Solubility:</b>	Water soluble
<b>Application:</b>	Pre-tanning of small pelts, tanning and retanning of “chromium free” leather.
<b>Properties:</b>	<p>The <b>UNISYNT® AL3</b> is a chemical balance of tanning salts. It is indicated to reach very tight grain articles, with shine dyeing and compact structure.</p> <p>The <b>UNISYNT® AL3</b> is a cationic product, not compatible with anionic auxiliary and fatliquors, requesting special attention to the formulation schedule.</p> <p>Can be used alone or combined with the <b>UNISYNT® HS</b> or <b>UNISYNT® FL LIQ.</b> For the small skins tanning.</p> <p>During the retanning process, the <b>UNISYNT® AL3</b> gives good buffing properties, as well as the severe elasticity reduction.</p> <p>The collagen – aluminum complex has a heavy molecular weight, that permits more compact fibers, good for strong kind of leather.</p>
<b>Use guideline:</b>	<p>We suggest to apply the <b>UNISYNT® AL3</b> in the following process:</p> <ul style="list-style-type: none"><li>💧 Pre-tanning: 2,0 - 4,0% over the limed weight;</li><li>💧 Tanning: 5,0 – 8,0% over the limed weight;</li><li>💧 Retanning: 3,0 a 5,0% over the shave weight.</li></ul>
<b>Storage:</b>	<p>We recommend keeping the product sealed in the original package, in a clean and controlled environment, avoiding extreme temperatures.</p> 
<b>Package:</b>	25 Kg plastic bags over 1000 Kg pallets.
