

Description:	Complexing agent for chrome tanning
Aspect:	Slightly bluish liquid.
Density:	0,99 – 1,00 g/cm ³ .
pH (sol. 10%):	6,5 – 9,0
Charge:	Amphoteric
Application:	Product developed for better float exhaustion in chrome tanning and retanning.
Properties:	<p>CHROMPLEX® CR is an amphoteric product, that fixes to the collagen, accelerating penetration and improving dispersion of the tanning agents, even in higher pH. The result of this technique is leathers more open, fine and tight grain, lower differential in the pH and better residual of Cr₂O₃ into the wet blue structure.</p> <p>Meanwhile penetrates, the chromium salts will fix all across the cut. So, basification will be lower or even unnecessary.</p>
Use guideline:	<p>We recommend to use the CHROMPLEX® CR as following:</p> <ul style="list-style-type: none">🔹 Chrome tanning: 1,0 – 3,0% over splitted weight🔹 Chrome retanning: 25% of chrome percentage used.🔹 Neutralization: 1,5 – 3,5%, with all neutralizing agents.
Storage:	<p>We recommend keeping the product sealed in the original package, in a clean and controlled environment, avoiding extreme temperatures.</p> 
Package:	1.000 Kg IBC.
