
Description:	Complex of chromium aluminum sulphate.
Aspect:	Light green powder.
pH (sol. 10%):	4,5 – 6,5
Charge:	Cationic
Cr₂O₃ content:	10,0 – 10,4%
Al₂O₃ content:	4,8 – 5,4%
Application:	Retanning.
Properties:	<p>UNICHROM® AL is a mineral product formulated from chromium and aluminum sulphates, respecting the chemical balance between these two tanning agents, enhancing the quality proportionated by this complexing reaction. UNICHROM® AL can be added directly in powder, without dilution. It will improve fullness, resulting in shining color, with excellent intensity, and a smooth and firm grain. Another characteristic is the good buffing effect to the end articles like split, suede and corrected grain.</p> <p>UNICHROM® AL can also be used to intensify and fixing anionic dyes.</p>
Use guideline:	<p>We suggest to apply in the chrome retanning from 2,0 – 8,0% over the shaved weight.</p> <p>In the retanning of vegetable or strongly vegetable retanning, between 3,0 to 9,0% of UNICHROM® AL over the shaved weight.</p>
Storage:	<p>We recommend keeping the product sealed in the original package, in a clean and controlled environment, avoiding extreme temperatures.</p> 
Package:	30 Kg plastic bags in 1.200 Kg wood pallets.
