

---

<b>Description:</b>	Blend of tannins with strong pyrogallic characteristics.
<b>Aspect:</b>	Light brown powder.
<b>Concentration:</b>	> 88%
<b>pH (sol. 10%):</b>	3,0 – 5,0
<b>Charge:</b>	Anionic
<b>Application:</b>	Retanning
<b>Properties:</b>	The <b>UNIPEL® TR</b> is a formulated vegetable tannin that belongs to the pyrogallic group, with a small quantity of tannins of the pyrocatechinic group, together with dispersing agents and iron sequestrants. This tannin has practically no dyes substances, which is why we can get very light color tanned leather, with better light fastness. The grain surface obtained with the <b>UNIPEL® TR</b> is firm, elastic and very uniform.
<b>Use guideline:</b>	<p>We recommend to use the <b>UNIPEL® TR</b> as main tannin agent in pickle pelts at pH 2,5 – 3, 0, using 35% over the pickled weight. This produces a very light vegetal article, ideal for the clear color articles.</p> <p>In the retanning we recommend from 8,0 a 15,0% as the article demands.</p>
<b>Storage:</b>	<p>We recommend keeping the product sealed in the original package, in a clean and controlled environment, avoiding extreme temperatures.</p> 
<b>Package:</b>	Plastic bags with 25 Kg on 875 Kg pallets.
