

Condensate phenolic syntan for white leathers

---

<b>Description:</b>	Phenol sulfonic acid condensate.
<b>Aspect:</b>	Light yellowish liquid.
<b>Concentration:</b>	42,0 - 44,0%
<b>pH (sol. 10%):</b>	3,5 – 4,5
<b>Charge:</b>	Anionic.
<b>Application:</b>	Pre-tanning and vegetable and white tanning, chrome retanning syntan.
<b>Properties:</b>	The <b>UNISYNT® CFL LIQ</b> is a special syntan recommended for white leather with good filling, smooth grain and multipurpose application.

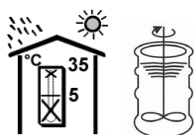

The **UNISYNT® CFL LIQ** improves considerable the bleaching and the fullness when used along other vegetable retanning agents. It helps to produce nice light colors, especially necessary for uniform colored grain surface.

Produces very nice and white sole leather, with great fullness, flexibility and excellent smooth touch.

**Use guideline:** The dose varies according to the desired effect:

- 💧 Pre-tanning: 2 – 4% over the limed weight;
- 💧 Chrome retanning: 4 – 6% over the shaved weight;
- 💧 White tanning: 35 – 50% over the limed weight.

**Storage:** We recommend keeping the product sealed in the original package, in a clean and controlled environment, avoiding extreme temperatures.

**Package:** 60 Kg and 200 Kg plastic drum or 1.100 Kg IBC.
