

Description:	Condensation of naphthalene sulphonic acid.
Aspect:	Dark brown powder.
Concentration:	Min. 92%
pH (sol. 10%):	7,0 – 9,0
Charge:	Anionic.
Application:	Retanning.
Properties:	Due to a strong dispersing and leveling effect, the UNISYNT® NSS is recommended to promote the dispersion of anionic products, like dyestuffs and vegetable based syntan. In the dyestuff process UNISYNT® NSS is especially indicated to promote leveling effect when dyeing with acid dyestuff, preventing the tendency surface spots.

As a retanning agent of chrome leather **UNISYNT® NSS** take the advantage of the maintenance of the characteristic chrome handle, with an exceptional fullness.

Use guideline: We would recommend applying **UNISYNT® NSS** in the dosage according the desired article:

-  Chrome tanning: 0,5 a 1,5% over the limed weight;
-  Chrome retanning: 0,5 a 4,0% over the wet blue shaved weight;
-  Dyeing: 0,5 a 4,0% over shaved weight.

Storage: We recommend keeping the product sealed in the original package, in a clean and controlled environment, avoiding extreme temperatures.

Package: 30 Kg plastic bags on 900 Kg pallets.
