
Description:	Lanolin with additives based on natural oils and special fatty alcohol.
Aspect:	Yellowish viscous liquid.
Concentration:	31 – 35%
pH (sol. 10%)	6,0 – 8,5
Charge:	Anionic
Application:	In the main fatliquor.
Properties:	<p>UP SOFT® AGL P is a lanolin-based fatliquor, with excellent lubricating power. Depending on the applied dose, it can reduce sensibly the absorption of water in chrome tanned leathers or semi chrome articles.</p> <p>Using UP SOFT® AGL P in fatliquor, we get a typical “butter cut” effect, resulted from the deep distribution. Other excellent result is the "dark burn", wanted in polished leather articles.</p> <p>UP SOFT® AGL P also provides a regulator effect of the humidity. In places of low relative humidity of the air, the leathers tend to dry more quickly with softness loss. This can be forewarned using UP SOFT® AGL P as part of the combination of fatliquors.</p>
Use guideline:	<p>The dose varies according the final article.</p> <p>It can be applied combined with other fatliquors of the UP SOFT® line:</p> <ul style="list-style-type: none"> Full grain shoes: 2,5 – 3,5% over the shaved weight; Nubuck shoes: 4% over the shaved weight; Semi chrome: 5% over the shaved weight; Burnished articles: 5 - 7% over the shaved weight;
Storage:	<p>We recommend keeping the product sealed in the original package, in a clean and controlled environment, avoiding extreme temperatures.</p> <div style="text-align: center;"></div>
Package:	190 Kg metal drums.
